Profile

Software engineering student actively seeking a summer internship to deepen my expertise in scalable software architecture, backend systems, and AI-powered applications. Skilled in developing scalable, user-centric applications using modern frameworks and AI models. Actively seeking to contribute to high-impact software projects while learning from experienced engineering teams.

Professional Experience

Full Stack developer Internship, NAXXUM GROUP

07/2024 – 08/2024 | Tunis, Tunisia

Engineered an online teaching platform using Node.js and Express.js with backend APIs supporting live sessions.

Created responsive and maintainable UI components using React.

Integrated MongoDB for real-time storage of student progress and scheduling data.

End-of-study Internship, SIGA

02/2023 – 06/2023 | Tunis, Tunisia

Developed a task-tracking web application to assist project oversight and internal coordination.

Implemented REST APIs and user modules using Spring Boot, Angular, and PostgreSQL.

Education

Engineering degree in software engineering, ESPRIT

09/2023 – present | Tunis, Tunisia

Bachelor degree in computer science, Faculty of Sciences of Tunis (FST)

09/2020 – 06/2023 | Tunis, Tunisia

Projects

PrimeProf

01/2025 – 05/2025

Built an AI-powered mobile education platform using Flutter, NestJS, and PostgreSQL.

Integrated LLAMA to personalize tutoring and automatically match students with suitable teachers.

GainUp, Fitness Coaching App

Developed a mobile fitness coaching app using Swift, NestJS, and MongoDB for beginners.

Integrated Gemini and Mistral AI to generate customized training routines based on user goals.

Sales management, Hackathon

Built a sales tracking application for construction companies in 24 hours using Flutter and NestJS.

Designed multi-branch tracking and inventory modules with MongoDB backend.

End-of-study project(PFE)

Led the development of a collaborative project management platform supporting multi-user task assignment and deadlines.

Implemented user authentication, real-time updates, and reporting dashboards with Spring Boot, Angular, and PostgreSQL.

Online ticket reservation, Desktop project ,Mobile

Built a ticket booking system using JavaFX and FlutterFlow for cross-platform compatibility. Implemented backend services with MySQL and modeled architecture with StarUML.

Community application, Hackathon

Assembled a mobile social platform for Esprit students featuring real-time podcasting and AI-based content suggestions using Flutter, NestJS, and MongoDB.

Competence

Java
